

BLUE CARD: QUICK GUIDE TO ICE INTERACTIONS

DO:

- Remain calm
- Designate an authorized individual to deal with raids; write their name/contact info below
- Clearly label private spaces; ICE can only enter these with a judicial warrant OR with provider consent.
 - If they ask for your consent to enter a non-public space, you can say no. They may enter anyway.
 - Ask officer for their name, ID #, affiliation, business card and copy of warrant; inform officer that you are not obstructing their process but need to contact the authorized individual for assistance.
 - Inform authorized individual of ICE presence. That person should request and review warrant. Only judicial warrants (signed by a judge) with clinic address are valid.
- Lock your computers and ensure PHI is not visible
- Call regional rapid response # to report ICE activity in clinic
- Hand patients a red card. Remind them of their rights (right to remain silent, right to counsel)
- Document ICE activity. Take notes with as many details as possible. You may record as long as you are in public and not interfering. Say "I am recording this"

DO NOT:

- Lie
- Stand in the way/obstruct ICE agents
- Share any information
- Sign anything

Things You Can Say:

- "I am not authorized to speak with you"
- "I need to contact our attorney"
- "I do not want to answer your questions"
- "I do not consent to this search"
- "I do not give you permission to enter"
- "Am I being detained? Am I free to go?"

AUTHORIZED INDIVIDUAL

**REGIONAL RAPID
RESPONSE #:**
